The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products, and medical devices.

Third-party type approval is required for all Category III personal protective equipment (PPE) products. CAT III products will be accompanied by a notified body number for the 3rd party verification of the product's safety.

The glass-fork-symbol guarantees that products live up to the demands stated in the European legislation for food contact materials. The symbol is not mandatory but advised on products used for food contact.

The product contains latex.

The glove has a smooth surface.

The glove is 240 mm long.

The glove has a medium grip.

EN374-5:2016

VIRUS

The standard specifies the requirements for protective gloves against hazardous chemicals and microorganisms. This part of the standard describes the glove's resistance to bacteria, fungi and viruses.

374-1:2016/

KPT

The standard specifies the requirements for protective gloves against chemicals and microorganisms. Type B has been tested for a permeation time of at least 30 minutes with the chemicals sodium hydroxide 40%, hydrogen peroxide 30% and formaldehyde 37%.

The standard specifies the requirements for protective gloves in relation to general requirements and test methods.
