## Disposable glove, THOR Ultra Grip Long, S, dark blue, nitrile, fish scale-textured, powder free

- ✓ Elastic and flexible material
- ✓ The gloves easily adapt to fit the hand
- ✓ Contain no latex proteins

### Product Description

Specially developed nitrile gloves with unique properties, not least their great strength and a really good grip. These disposable gloves also have a great fit thanks to their elastic structure. The gloves do not contain any latex proteins. This means that the gloves are safe to use by people with a latex allergy. Available in various sizes.

**HIGH GRIP**

**EN 420**

### Specifications

**CE** The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products, and medical devices.

The glass-fork-symbol guarantees that products live up to the demands stated in the European legislation for food contact materials. The symbol is not mandatory but advised on products used for food contact.

**CAT III** Third-party type approval is required for all Category III personal protective equipment (PPE) products. CAT III products will be accompanied by a notified body number for the 3rd party verification of the product's safety.

The product does not contain latex.

The glove has a finger textured surface.

**HIGH GRIP** The glove has a high grip.

The glove is 300 mm long.

**374-1:2016/TYPE B**  
 The standard specifies the requirements for protective gloves against chemicals and microorganisms. Type B has been tested for a permeation time of at least 30 minutes with the chemicals sodium hydroxide 40%, hydrogen peroxide 30% and formaldehyde 37%.

**EN374-5:2016**  
 The standard specifies the requirements for protective gloves against hazardous chemicals and microorganisms. This part of the standard describes the glove's resistance to bacteria and fungi, but to viruses.

**EN374-2**  
 The standard specifies a method for testing gloves to determine whether the glove provides resistance to the permeation of chemicals and/or microorganisms. The test consists of an air and water test to identify leaks in the glove. They follow the ISO 2859 sampling plan. Not all gloves can be tested with air. In this case a water test is used.

**EN 420** The standard specifies the requirements for protective gloves in relation to general requirements and test methods.
